

## Campus Updates

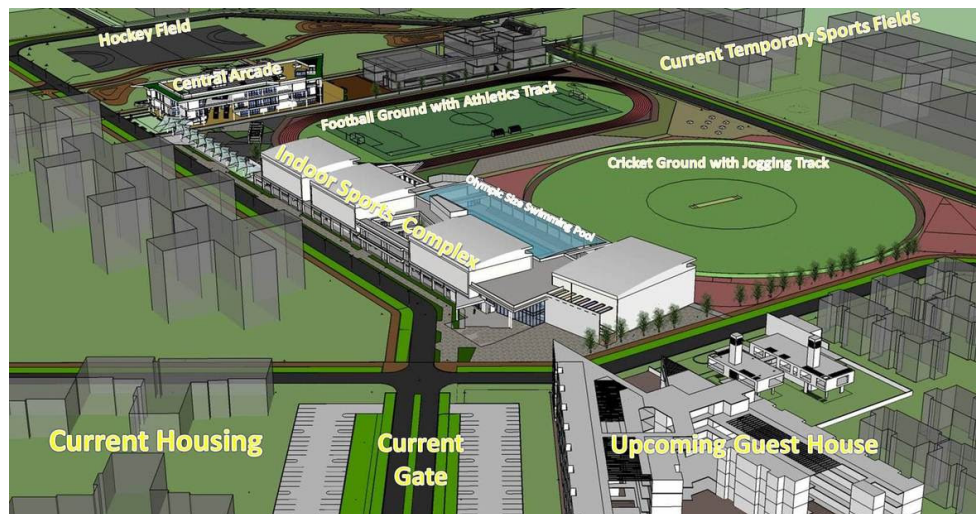

Announcements and happenings on campus

---

### Construction Updates

- 1) Entrance Gate Complex:** Work has started at the Basan Gate & the Main Gate at the scenic drive. The entrance gates consist of security offices and public washrooms. The housing gate (that is currently being used as the main gate) will be taken up once the other two gates are ready.
- 2) Boundary Wall:** Foundation and concrete work are in progress, you might want to be on the lookout for red exposed brickwork and grills that have already started coming up in some portions of the wall.
- 3) Parking near Housing Block 01 and 30:** A new parking facility is being created next to housing blocks 30 and 1.
- 4) Guest House:** The foundation work is in progress. The guest house will have 70 rooms, 12 long-stay suites and several additional facilities like a 100 person capacity conference hall, multiple meeting rooms, and dining facilities.
- 5) Sports Complex & Central Arcade:** The work for the sports complex, sports grounds and central arcade has started, expect to see barricading work over the next few days. The sports complex is expected to be one of the unique facilities on campus and will include an olympic-size swimming pool, an indoor gym, squash

courts, badminton courts, table tennis tables, indoor basketball and volleyball courts, a climbing wall, and outdoor football and cricket grounds along with a synthetic athletics track and a jogging track. It is also worth noting that almost all the full-grown trees on this site (except one) are being saved and some of them come within the buildings and within fields, creating a unique sports facility.

### Work Space for All

AB-06/407 has been furnished as a work-space with working tables and chairs. All are welcome to use this space for studying, working, collaborative discussions etc. Note that none of the seats are assigned to anybody and are available on a hot seat basis. This facility is now open for use.

### Housing for Married Students

About 100+ studio apartments with a compact living area, kitchenette, sleeping area, and a small balcony are being planned and will surely come as a relief to many married students. Along with the studio apartments, a handful of compact 1BHK and 2BHK are also being planned for various other needs and will come up over the next couple of years across from the housing lake (on the Basan side).

### Water Bodies on Campus

As you may have seen, both the lakes on campus have recently been cleaned up and are in the process of being tested. These are great locations for morning and evening strolls, especially with numerous birds and wildlife that are attracted to these water bodies.

---

## Construction Workers' Housing

Construction workers housing for about 120 labourers for the Guest House project were inaugurated on 23rd January. These are 'pukka' houses with clean drinking water and dignified sanitation facilities.
